Functional Neuroimaging Symposium

The UCSD Clinical and Translational Research Institute and the UCSD Center for Functional Magnetic Imaging are co-hosting a symposium on Functional Neuroimaging on Monday, October 22, 2012. The talks include:

- New ways of doing fMRI, John Serences, Ph.D., Department of Psychology, UCSD.
- Methodological hurdles for studying memory with fMRI: the case of the medial temporal lobe, Christine Smith, Ph.D., Department of Psychiatry, UCSD.
- Can fMRI be used for Mind Reading?, Jesse Rissman, Ph.D., Department of Psychology, UCLA.
- Resting-state fMRI and the Human Connectome, Tom Liu, Ph.D., Departments of Radiology and Bioengineering, UCSD.
- This is your brain on drugs: What neuroimaging has shown us about how alcohol and drugs may alter adolescent brain development, Susan Tapert, Ph.D., Department of Psychiatry, UCSD.
- Looking inside the sleeping brain with fMRI, Sara Mednick, Ph.D., Department of Psychology, UC Riverside
- fMRI approaches to network connectivity in autism spectrum disorders, Ralph-Axel Mueller, Ph.D., Department of Psychology, San Diego State University
- Functional brain basis of elite performance, Martin Paulus, M.D., Department of Psychiatry, UCSD

The event will be held in the Medical Education and Telemedicine Building on the UCSD campus from 9:00 a.m. – 4:30 p.m. Registered attendees will also be able to tour the UCSD Center for fMRI at the conclusion of the meeting. For additional information on the meeting as well as to register for the event, please visit http://ucsdfunctionalneuroimaging.eventbrite.com
